PROJECTS

CRAFTOGRAM - Platform for Handicraft Artists

July 2024

- A handicraft website for local or small artisans to showcase their work so that others can praise their work.
- A comprehensive platform designed to empower handicraft artisans by providing them with a digital space to showcase their creative work, share their stories, and connect with buyers, event organizers, and fellow artisans.
- Tools Used: HTML, CSS, JavaScript, MYSQL, PHP

XPENSO - Expense Tracker for College Students

Jan 2025

- Developed a student-focused expense tracking system to monitor daily spending and visualize financial data through interactive dashboards.
- Integrated OCR image recognition for bill scanning and a voice input system to enable effortless expense entry for students.
- Tech Stack: MongoDB, Express.js, React.js, Node.js

COLLABRY: Forums and Project Collaboration

July 2025

- Developed a web-based college discussion forum to organize academic, career, and project-related discussions in one platform.
- Implemented structured discussion threads and a project collaboration feature enabling students to share ideas and find teammates based on skills.
- Built with the MERN Stack, including secure user authentication and admin moderation for verified and meaningful interactions.

VibeCheck – AI Student Engagement Analytics Platform

September 2025

- Built a computer vision-based system to track student attention, detect classroom chaos, and generate real-time engagement analytics.
- Applied deep learning pipelines for pose, face, and activity detection.
- Tech Stack: OpenCV, MediaPipe, YOLOv8, Python

SKILLS

Programming Skills :- Python, React, HTML, CSS, PHP,

Databases :- MYSQL

Tools :- Git, CANVA, VS CODE

HACKATHON

Code Odyssey 4.0 (Tata STRIVE): Participant | Team Code Quest
