EDUCATION

K. J. Somaiya Institute of Technology, Sion, Mumbai University — **2023 - 2027**
- Bachelor of Technology - Computer Science, Honors in Data Science - CGPA : 8.4 (Full-time)

Global Public School & Jr. College, Nashik, Maharashtra State Board — **May 2023**
- Senior Secondary Education - Grade 12th Boards: 72.83% (Full-time)

Aadarsh Secondary English Medium School, Nashik, Maharashtra State Board — **May 2021**
- Higher Secondary Education - Grade 10th Boards: 92% (Full-time)

STRONG SUBJECTS

Data Structures & Algorithms (DSA) • Operating Systems(OS) • Design & Analysis of Algorithms (AOA) • Database Management Systems (DBMS) • Computer Networks (CN) • Object-Oriented Programming (OOP) • Software Engineering

SKILLS

- Programming Skills :- Python, React.js, HTML, CSS, PHP, Javascript, Tailwind CSS, Node.js, Express.js, FastAPI Databases :- MYSQL,Supabase, Firebase
- AI / Machine Learning :- Python, Tensorflow, OpenCV, MediaPipe, YOLOv8, Hugging Face Transformers
- Tools :- Git, VS Code
- APIs & Technologies :- Firebase Authentication, OCR Integration

WORK EXPERIENCE

Web Developer Intern-BeyondBound (Ayurhelix Pvt Ltd) — **Jan 2026 - Apr 2026**
- Built and developed the company website using React, delivering responsive, cross-device UI aligned with product and brand requirements
- Collaborated with design and product teams to translate wireframes / prototypes into scalable, reusable components
- Contributed to performance optimization and maintained clean, maintainable frontend code in a fast-growing startup environment

PROJECTS UNDERTAKEN

Aquaculture Intelligence Platform (Major Project) — **Jan 2026 - Present**
- Explainable AI for Risk Prediction & Sustainable Farming: built PSG, a unified multi-track ML framework fusing benchmarked productivity, sustainability,and genomic risk models (Extra Trees, MLP, HistGradientBoosting) into a single farm-level risk score via a fixed-weight rule.
- Consolidated an 11,657-record, 242-country dataset and integrated ARIMA(1,1,1) forecasting with a Streamlit dashboard for real-time predictions and policy recommendations.

UnderDog - Guardrail Security Layer for GenAI | 2nd Runner-Up, KODE Hackathon — **Apr 2026**
- Built a full-stack security layer that intercepts prompt injections, jailbreak attempts, and unsafe outputs before they reach or leave GenAI models.
- Implemented real-time PII/sensitive data leak detection using rule-based checks, ML models, and vector intelligence (ChromaDB).
- Shipped as a Chrome Extension integrating directly into user workflows; built end-to-end in 24 hours using FastAPI, React, Firebase, Hugging Face, and Groq.

COLLABRY: Forums and Project Collaboration — **July 2025 - Nov 2025**
- Developed a web-based college discussion forum to organize academic, career, and project-related discussions in one platform
- Implemented structured discussionthreads and a project collaboration feature enabling students to share ideas and find teammates based on skills
- Built with the MERN Stack,including secure user authentication and admin moderation for verified and meaningful interactions

HACKATHONS & COMPETITIONS

Code Odyssey 4.0 (Tata STRIVE) : Participant | Team Code Quest
- Vibe Check-AI Student Engagement Analytics Platform

CodePrix1.0 Hackathon : First-RunnerUp | Team Git Push Girls
- RADAR-AI Campaign Forecasting Platform

KODE-IET Hackathon Finale : Second-Runner Up | Team Git Push Girls
- UnderDog-AI Guardrail Security Layer
